NETWORK ACCESS SERVICE

ADOPTION OF 'WECA TARIFF'

1. By this reference thereto, Mashell Telecom, Inc., Rainier Connect or The Rainier Group (the "Company") hereby adopts and concurs in Washington Exchange Carrier Association Tariff WN U-2 (the 'WECA Tariff') as modified hereby under the heading "Modifications", and excepting there from those portions thereof set forth below under the heading "Exceptions". The regulations, rate and charges applicable to the provisions of Switched Access Service, Special Access Service and other miscellaneous service provided by the Company to Intrastate Customers ("ICs") are the same as those in WECA Tariff. The Company provisions of service as set forth in the WECA Tariff is specially intended to provide exchange network access to ICs for their own use or in furnishing their authorized intrastate service to end users, and for operational purposes directly related to the furnishing of their authorized services and no other. Operational purposes include testing and maintenance of circuits, demonstration and experimental services and spare services. Telephone exchange services required by the ICs for their individual administrative use are furnished under other applicable schedules of this tariff. Based ICs use of the facilities involved, the Company will determine whether the access rates and charges specified in WECA Tariff or the rates and charges in other schedules of this tariff apply.
2. Any reference to "Contel Tariff" herein is inadvertent and shall be deemed to mean "WECA Tariff". All references to "Telephone Company" in the WECA Tariff shall be deemed to mean Mashell Telecom, Inc., and all reference therein to "WN U-2" shall be deemed to read PRICE LIST NO. 6
3. EXCEPTIONS
 - a. Any provision of the WECA Tariff which relates to services which the Company cannot provide with its existing facilities and equipment shall not apply.
 - b. Any provision in the WECA Tariff related to Feature Group C (FGC) services do not apply since the Company is not providing Feature Group C Service.

NETWORK ACCESS SERVICE

3. EXCEPTIONS (Continued)

c. Substituted Rates and Charges:

Notwithstanding any provision of WECA Tariff WN U-2 to the contrary, the rates and charges specified below for Local Transport Facility under Section 5.7.5 (“minimum Monthly Usage Charge”) and/or Section 5.8.1(A) (“Local Transport”) shall apply per BHMC, per line or trunk, or per access minute, as indicated below, rather than per BHMC (line, trunk or access minute) per mile, and shall apply without regard to the application of any billing percentage (“BP”) or interconnection point factor (“ICP Factor”). The said Local Transport Facility rates and charges apply based upon the company end office location at which the local transport facility originates or terminates.

Any language contained in WECA Tariff WN-2 pertaining to the calculation and application on a per mile basis or rate elements and/or rate sub-elements set forth in Section 5.7.7 and/or Section 5.8.1(A) shall not apply; provided, however, that, where appropriate, such language shall be deemed modified to the minimum extent necessary to render it consistent with the matters set forth in this Paragraph 3 b. and with the rates and charges specified below under Section 5.7.5 and/or Section 5.8.1(A), and such language shall apply as so modified.

The rates and charges set forth herein below shall apply in lieu of the corresponding rates and charges set forth in the sections of the WECA Tariff identified herein below. For any rate element or rate sub-element not listed below the rates and charges set forth in the WECA Tariff shall apply.

d. General Exception for Measurement and Billing

Notwithstanding anything to the contrary in WECA Tariff WN U-2, the Company, at its option, will use the following measurement parameters where messages are delivered to the Company without sufficient information available for the Company to develop terminating access records in the normal manner: the Company will use Signaling System 7 (SS7) ISDN user part (ISUP) to determine the measurement times for a message for purposes of access billing. Specifically, the call will be deemed to begin for billing purposes with transmission of the Address Complete Message and the message will be deemed to be complete for billing purposes with transmission of the Release Complete Message.

3. EXCEPTIONS (Continued)

c. 800 Data Base Access Service (Continued):

- For Feature Group A Switched Access Service, the customer shall specify the number of lines and the first point of switching (i.e., dial tone office), the Local Transport options and Local Switching options desired. In addition, the customer shall specify whether the off-hook supervisory signally is provided by the customer's equipment before the called party answers, or is forwarded by the customer's equipment when the called party answers. The customer shall also specify which lines are to be arranged in multilane hunt group arrangements and which lines are to be provided as signal lines.
- For Feature Group B Switched Access Service, the customer shall specify the number of trunks and the end office when direct routing to the end office is desired or the access tandem switch when routing is desired via an access tandem switch and Local Transport options and Local Switching options desired. The customer shall also specify for terminating only access minutes, whether the trunks are to be arranged in truck group arrangements or provided as signal trunks.
- For Feature Group D Switched Access Service, the customer shall specify the number of busy hour minutes of capacity (BHMC) from the customer designated premises to the end office by Feature Group and by type of BHMC. This information is used to determine the number of transmission paths as set forth in 5.5.5 following. The customer then specifies the Local Transport, Local Switching and Interim NXX Translations options.

c. 800 Data Base Access Service

- Additionally, when Feature Group D Switched Access Service is ordered with the Interim NXX Translations optional feature, the customer shall specify the Service Access code(s) (e.g., 900) and their associated NXX code(s) to be translated within the entire LATA or Market Area. The initial and subsequent orders to add, change, or delete Interim NXX Translation codes shall be placed separately or in combination with orders to change Feature Group D Switched Access BHMC or trunks. Customer assigned NXX codes, which have not been ordered, will be blocked.
- Orders for the Interim NXX Translation optional feature shall not be required until such time as a customer other than an MTS/WATS provider requests Interim NXX Translation of Service Access Codes. MTS/WATS provider(s) of the activation of the Interim NXX Translation Service for the Service Access Code. Following such initial activation, all customers are required to place orders for interim NXX Translation of the Service Access Code and the Interim NXX Translation charge for the Service Access code shall apply as set forth in 5.8.3 following.
- Customers other than an MTS/WATS provider may, at their option, order DGD by specifying the number of trunks desired between customer designated premises and an entry switch. When ordering by trunk quantities rather than BHMC quantities to an access tandem, the customer must also provide the Telephone Company an estimate of the amount of traffic it will generate to and/or from each end office subtending the access tandem to assist the Telephone Company in its own effort to project further facility requirements.

3. EXCEPTIONS (Continued)

c. 800 Data Base Access Service (Continued):

- Special Access Service may be ordered for connection with FDG Switched Access Service at Telephone Company designated WATS Service Offices (WSOs) for the provision of WATS or WATS-type Services and may be ordered separately by a customer other than the customer which orders the FDG Switched Access Service. For the special Access Service the customer shall specify the customer designated premises at which the Special Access Service terminates, the type of line (i.e., originating, terminating, or two-way) and type of Supervisory Signaling. When the optional screening, switching and/or recording functions are not provided at the customer serving wire center, Channel Mileage, as set forth in 6.2.1 following, must be ordered between that wire center and the nearest WSO where the screening switching and/or recording functions can be provided. For all special Access Services, the customer must specify the customer designated premises or hubs involved, the type of service (e.g. Voice Grade, High Capacity), the channel interface, technical specifications package and options desired. For multipoint services, the channel interface at each customer designated premises may, at the request of the customer, be different but all such interfaces shall be compatible.

NETWORK ACCESS SERVICE

3. EXCEPTIONS (Continued)

c. 800 Data Base Access Service

- The BHMC may be determined by the customer in the following manner. For each day (8 a.m. to 11 p.m., Monday through Friday, excluding national holidays), the customer shall determine the highest number of minutes of use for a single hour (e.g., 55 minutes in the 10-11 a.m. hour). The customer shall, for the same hour period (i.e., busy hour) for each of twenty consecutive business days, pick the twenty consecutive business days in a calendar year which add up to the largest number of minutes of use. Both originating and terminating minutes shall be included. The customer shall then determine the average busy hour minutes of capacity (i.e., BHMC) by dividing the largest number of minutes of use figure for the same hour period for the consecutive twenty business day period by 20. This computation shall be performed for each end office the customer wishes to service. These determinations thus establish forecasted BHMC for each end office.

8. 800 Data base Access Service

- a. The following new definitions are added to Section 2.6 of WECA Tariff WN U-2

800 Service Management System

The term "800 Service Management System" (800SMS) denotes the main operations support system used to create and update 800 service records in the national 800 data base.

3. EXCEPTIONS (Continued)

c. 800 Service Provider (Continued):

800 Service Provider

The term "800 Service Provider" denotes a telecommunications company, including Exchange and Interexchange Carriers, that offers 800 Service to subscribers.

Query

The term "Query" denotes a request for specific information generated by a Computer processor and sent to a data base, with a predefined set of responses expected.

Response

The term "Response" denotes one response from a set of predefined expected responses to a request for information contained in a query from a computer processor.

Responsible Organization (RESPORG)

The term "Responsible Organization" denotes the entity that is responsible for the management and administration of 800 Data Base Access Service records in the 800 Service Management System.

Service Switching Point (SSP)

The term "Service Switching Point" denotes a signal point equipped with the ability to halt call process, formulate and send a SS7 query to a remote location and route the call based on information contained in the response.

3. EXCEPTIONS (Continued)

c. 800 Data Base Access Service (Continued):

- (e) The following new Section 4.2.9 is added to Section 4.2 of WECA Tariff WN U-2:

“4.2.9 800 Data Base Access Service

For 800 Data Base Access Service, as described in 5.1.2(C)(2) and 5.3.3(B) following, the customer must order FGD to those access tandems or end offices designated by the Telephone Company as Service Switching Points (SSP) for 800 Data Base Access Service. Direct trunk routes can only be provided from end offices equipped to query centralized data bases. All 800 Data Base Access Service traffic originating from end offices not equipped to provide SS7 Signaling and routing require routing via an access tandem where SSP Functionality is available.”

- (f) The first paragraph of Section 5.1.2(C)(1) of WECA Tariff WN U-2 is modified to read as follows:

“(1) Interim NXX Translation

The Interim NXX Translation rate elements provide for customer identification Of non-data base calls dialed by end users in the 1+SAC+NXX-XXXX (e.g., 1+900+NXX+XXXX) format. The NXX codes are assigned to specified customers in conformance with the North American Numbering Plan (NANP) NXX code assignment(s) will be made by the Bellcore NAN Coordinator, or Such other authority as the Federal Communications

c. 800 Data Base Access Service (Continued):

(f) (Continued)

“(1) Interim NXX Translation (Continued)

Commission may designate for such purpose. The Telephone Company will use the NXX code to identify the customer to whose point of termination the traffic is to be delivered (i.e., at appropriately equipped electronic end offices, access tandems or through contracted arrangements with other parties). It is then the responsibility of the customer to do any further translation the customer deems necessary and route the call. Customer assigned NXX codes which have not been ordered will be blocked.”

(g) The following new Section 5.1.2(C)(2) is added to Section 5.1.2(C) of WECA Tariff WN U-2:

“(2) 800 Data Base Access Service

800 Data Base Access Service is provided to all customers in conjunction with FGC and FGD switched access service. When a 1+800+NXX+XXXX call is originated by an end user, the Telephone Company will utilize the Signaling System 7 (SS7) network to query an 800 data base to identify the customer to whom the call is to be delivered and provide vertical features based on the dialed ten digits. If other necessary facilities and/or services (e.g., trunks to the Service Switching Point (SSP) initiating the query) have been ordered and installed, the call will then be routed to the identified customer over FGD switched access service.

d. 800 Data Base Access Service (Continued):

(g) (Continued)

“(2) 800 Date Base Access Service (Continued)

A Basic Query or Vertical Feature Query charge, as set forth in 5.8.1(E)(1) following, is assessed for each query launched to the data base which identifies the customer to whom the call is to be delivered. The Basic Query provides the identification of the customer to whom the call is to be delivered and includes area of service routing which allows routing of 800 calls by telephone companies to different interexchange carriers based on the Local Access Transport Area (LATA) in which the call originates. The Vertical Feature Query provides the same customer identification as the basic query and vertical features which may include: (1) call validation (ensuring that calls originate from subscribed service areas); (2) POTS translation of 800 numbers; (3) alternate POTS translation (which allows subscribers to vary the routing of 800 calls based on factors such as time of day or place of origin of the call); and (4) multiple carrier routing (which allows subscribers to route to different carriers based on factors similar to those in (3)). When POTS translation of 800 numbers is to be furnished, the 800 Data Base Access Service customer must provide to the 800 SMS the full ten-digit local exchange number (NPA-NXX-XXXX) to be associated with the 800 number. In all cases where 800 Data Base Access Service is to be utilized, the carrier to which the 800 call is to be delivered must be provided by the 800 Data Base Access Service customer to the 800 SMS.

“(2) 800 Data Base Access Service (Continued)

The description and application of this charge with respect to Feature Group D is as set forth in 5.7.1(D)(7) and 5.7.1(D) following.”

(h) Section 5.2.3(B)(4) and Section 5.2.5(B)(4) of WECA Tariff WN-U2 shall each be deemed to read as follows:

“(4) Chargeable Optional Features

a. Interim NXX Translation (as set forth in 5.3.3(A) following)

b. 800 Data Base Access Service (as set forth in 5.3.3(B) following)

(i) Section 5.3.3(A) of WECA Tariff WN U-2 shall be deemed modified to read as follows:

“(A) Interim NXX Translation

Interim NXX Translation optional feature is an originating offering utilizing trunk side Switched Access Service. The service provides a customer identification function based on the dialed non-data base SAC-NXX number (e.g., 900-NXX number).

3. EXCEPTIONS (Continued)

c. 800 Data Base Access Service (Continued):

(I) (Continued)

“(a) Interim NXX Translation (Continued)

when a 1+SAC+NXX-XXX non-data base call is originated by an end user, the Telephone Company will perform the customer identification function based on the dialed digits to determine the customer location to which the call is to be routed. If the call originates from an end office switch not equipped to provide the customer identification function, the call will be routed to an office at which the function is available. Once the customer identification has been established, the call will be routed to the customer. Calls originating from an end office switch at which the customer identification function is performed, but to which the customer has not ordered Interim NXX Translation, will be blocked.

The manner in which Interim NXX Translation is provided is dependent on the status of the end office from which the service is provided (i.e., equipped with equal access capabilities or not equipped with equal access capabilities). When Interim NXX Translation is provided from an end office equipped with equal access capabilities, it will be provided in conjunction with FGD Switched Access Service.

c. 800 Data Base Access Service (Continued):

(j) The following new Section 5.3.3(B) is added to Section 5.3.3 of WECA Tariff WN U-2

“(B) 800 Data Base Access Service

800 Data Base Access Service is provided with FGD switched access service. When a 1+800+NXX-XXXX call is originated by an end user the Telephone Company will utilize the Signaling System 7 (SS7) network to query an 800 data base to identify the customer to whom the call is to be delivered and provide vertical features based on the dialed ten digits. If other necessary facilities or services (e.g., trunks to the Service Switching Point (SSP) initiating the query) have been ordered and installed, the call will then be routed to the identified customer over FGD switched access service.

A Basic Query or Vertical Feature Query charge, as set forth in 5.8.1(E)(1) following, is assessed for each query launched to the data base which identifies the customer to whom the call is to be delivered. The Basic Query provides the identification of the customer to whom the call is to be delivered and includes area of service routing which allows routing of 800 calls by telephone companies to different interexchange carriers based on the Local Access Transport Area (LATA) in which the call originates. The Vertical Feature Query provides the same customer identification as the basic query and vertical Features which may include: (1) call validation (ensuring that calls originate from subscribed service areas); (2) POTS translation of 800

3. EXCEPTIONS (Continued)

c. 800 Data Base access Service (Continued):

- When 800 Data Base Access Service originates at an end office equipped with Service Switching Point (SSP) capability for querying centralized data bases, all such service will be provisioned from that end office.
- When 800 Data Base Access Service originates at an end office not equipped with SSP customer identification capability, the 800 call will be delivered to the access tandem on which the end office is homed and which is equipped with the SSP feature to query centralized data bases.
- Query charges as set forth in 5.8.1(E) are in addition to those charges applicable for Feature Group D "Switched Access Service".

(k) The following new Section 5.7.1(D)(7) is added to Section 5.7.1(D) of WECA Tariff WN U-2.

(7) 800 Data Base Access Service

A Basic Query or Vertical Feature Query charge applies for each query that is launched to an 800 database and identifies the customer to whom the call is to be delivered.

(k) Continued

(7) 800 Data Base Access Service (Continued)

When Feature Group D switched access service is used for the provision of 800 Data Base Access Service and the total minutes of use and/or count of queries can be determined for each customer at a tandem or SSP but cannot be determined by individual end office, an allocation method will be utilized to determine minutes of use and/or queries by end office and customer. For each end office a ratio will be developed and applied against the total minutes of use and/or count of queries for a given customer as determined by the tandem or SSP. These ratios will be developed by dividing the unidentified originating 800 minutes of use and/or queries in all end offices subtending the tandem or SSP. For example, assume:

- Three end offices (EO-1, EO-2 and EO-3) subtend a tandem
EO-1 measures 2,000 minutes of 800 use
EO-2 measures 3,000 minutes of 800 use.
EO-3 measures 5,000 minutes of 800 use
10,000 TOTAL

- The tandem delivers 800 usage to two customers:

IC-A has 4,000 minutes of use
IC-B has 6,000 minutes of use
